AFFILIATIONS

“Somewhere, something incredible is waiting to be known.”

Institute of Biology and Clinical Research (IBCR) is a new initiative from a group of clinical professionals, physicians and scientists, with head office based in Trivandrum, India. IBCR offers wide range of services in the field of biology and medical research. IBCR attempts to execute quality drug development programs in IBCR associated hospitals.

We assist sponsors to bring clinical studies to successful completion quickly and cost effectively. Our sole objective is to support the desired outcome of clinical trials through expeditious clinical trial execution at our trial sites across globe in a sustained and globally acceptable manner.

IBCR business is based on a clear vision, a strong set of ethical values and a consistent corporate governance model.

Indian Healthcare Capability

- India has the 2nd highest number of qualified doctors in the world.
- India is emerging as favorable destination for clinical research ahead of countries like Israel, Philippines, Canada, China, Ireland & Russia in terms of Overall Climate
- While clinical trials cost approximately \$300 to 350 million in US, they cost about \$25 million in India.
- Investigational New Drug stage costs about \$100 to 150 million in US, but costs only around \$10 to 15 million in India
- India's huge population and the prevalence of a wide spectrum of disease conditions offer a wide patient-resource for clinical trials
- 700,000 science and engineering graduates & 1500 PhDs qualify annually.
- Appreciable quality management, Technology and infrastructure.
- Strong IT industry availability of IT skilled manpower. Surplus English speaking technical professionals.

Our Legacy

- Customer Focused
- Can-Do-Spirit
- Continuous Improvement
- Ethical and Professional

Service Concept

At IBCR we care for sponsor needs and understand sponsor's requirement. That's why we've structured IBCR to be client-centric in all that we do. Clinical management services are at our nucleus and the supporting functional areas serve into the teams that manage and conduct client projects. Our people are keen in clear accountability for overall outcomes and deliverables. IBCR offers a comprehensive suite of clinical services to meet your needs.

Support services

IBCR understand our client's world and will continuously focus to provide innovative solutions to alleviate the risk involved in the planning and execution of clinical trial projects. We provide clinical services in the following area;

- ★ Investigator Relations
- ★ Clinical project feasibility
- ★ Clinical Trial Services (Site selection, Clinical trial execution, Site management)
- ★ Clinical Writing / Research publication
- ★ Clinical Quality Assurance
- ★ Central Ethics Committee
- ★ Training
- ★ Freelance monitoring
- ★ Clinical trial resource
- ★ Central archival of clinical data

Therapeutic Expertise

Our IBCR investigators has more than 10 years experience in working closely with patient and has establishes a reputed brand in their respective field. Many investigators are involved in drug development consultation and conducting global clinical studies. Presently more than 200 Investigators have been contracted for clinical research projects execution with IBCR.
